PROFILE

Currently studying Computer Science at the University of Bucharest. Love to create relevant products from nothing, but imagination along with a group of devoted people. By working with a friend to create iGorj I have demonstrated teamwork. I was involved in camps and projects organized by the University of Bucharest, Polytechnic University of Cluj and Bucharest or Scout Society where I was participant or volunteer. Those were linked to computer science, engineering, law, journalism, economy, and social problems.

EDUCATION

Oct 2019 — Present

Bachelor in Computer Science, University of Bucharest

Admission exam: 9.54/10, 5th out of almost 1200 participants

Sep 2015 — Jul 2019

Maths - Informatics, "Tudor Vladimirescu" High School

Targu Jiu

Baccalaureate grade: 9.50/10 with 10/10 in Maths and 10/10 in Informatics.

Oct 2019 — Present

Bachelor in Law, University Constantin Brancusi

HOBBIES

Basketball, Competitive Programming, Movies, Literature, Science

EXTRA-CURRICULAR ACTIVITIES

Nov 2019 — Present

Member in Organising and Scientific Committees

I am one of those who organize "AGM" (an international contest, <https://agm-contest.com/>) and "FMI nostress" (faculty's competition, being the coordinator along with my professor), both of them are programming contests.

Sep 2015 — Present

Competitive Programming Contestant

During my journey in competitive programming, I managed to be 1st in my county 3 times, 1st in my region both in teams and individuals. Regarding the national stage, I obtained 3 medals. I also periodically participate in online contests on platforms like Codeforces, being a 1st division solver. My latest performance is to be 24th at South East European Programming Competition (ICPC).

Apr 2019 — Present

Founder at iGorj

Targu-Jiu

iGorj is an organization that leads the high school students in their path towards finding the best university for them, organizing activities in this scope, but also presenting them subjects like cryptography, artificial intelligence and others from this field.

Dec 2018 — Present

Teacher

Since I was in high school, I was passionate by presenting ideas and teaching the others. I started to hold courses for those who wanted to prepare for the Olympiad in Informatics in my high school, and now I shifted to the next level. I prepare weekly a group of students for both Olympiad and admission exam. One of my students is in this moment one of my faculty colleague, I helped him to be 13th after the admission. I am also the mentor for some student qualified for the national stage.
